Professional summary

Software engineer with web application experience since 2022, working with C#/.NET, Node.js, Python, React and Vue. I have worked as a contractor at IngaCode since 2023, contributing from requirements through deployment and resolving production issues. My background in technical support and server administration helps me investigate issues across APIs, databases, interfaces and infrastructure.

Technical skills

Back end: C#/.NET, Node.js, Python, ASP.NET Core, Entity Framework, REST APIs, microservices and the Mediator pattern.

Data and integrations: SQL Server, PostgreSQL, MongoDB, Redis and RabbitMQ.

Testing and delivery: xUnit, Jest, Git, Docker, Linux and CI/CD with Azure DevOps.

Front end: React, Vue.js, Nuxt, JavaScript and TypeScript; experience with React Native.

Professional experience

IngaCode | Full Stack Developer · Contractor

Feb 2023 – present

- Contribute to team releases from requirements analysis through deployment, working on APIs, microservices and front ends.
- Investigate and fix production bugs in APIs, microservices and interfaces.
- Independently developed and delivered a release using Vue 2 on the front end and .NET 8 on the back end.
- Develop REST APIs with ASP.NET Core, C# and Entity Framework, Vue.js/Nuxt interfaces, and integrations with RabbitMQ and SQL/MongoDB databases.
- Work with xUnit and Jest tests, Docker containers and Azure DevOps CI/CD pipelines.

NeoTecHouse Info | Front-end / Mobile Developer

2022 – 2023

- Developed web and mobile applications with React, React Native and TypeScript, integrated with REST APIs.

Additional experience

NeoScan / Moltres Scan | System Administrator

2017 – present · Remote, alongside primary employment

- Administer the infrastructure of a SaaS for Pokémon GO players, providing real-time maps and Discord alerts.
- Work with Ubuntu servers, Apache, PHP, MariaDB, Docker and automation in Python, Node.js and shell. I manage this remote operation alongside my primary contracting work at IngaCode.

NeoTecHouse Info | Technical Support | 2010–2022

Compmaster Informática | Technical Support | 2006–2010

Provided end-user support, administered servers, and installed and maintained networks and computers.

Selected personal projects

NeoTasks | C#, .NET, React and PostgreSQL

Project, task and time-tracking application with organization-scoped data, JWT authentication, session renewal, password recovery and an audit trail. Runs with Docker Compose and includes integration tests against PostgreSQL.

NeoTasks source code and setup instructions

CrecheCad | C#, .NET, EF Core, SQLite and Vue/Nuxt

School management application for students, classes, teachers and documents. Includes staff access roles, auditing, paginated search and a backup procedure. API and interface run with Docker Compose; the README includes screenshots and an evaluation walkthrough.

CrecheCad source code and setup instructions

Education

Degree in Computer Networking Technology | FAE Centro Universitário, São José dos Pinhais, Brazil | Completed December 2017

Courses and additional training

WEX - End to End Engineering | DIO | Completed July 18, 2025 | 91 hours

Full Stack Developer (.NET, C# and React) | DIO | 2024 | 127 hours

Vue.js 3 | Alura | 2023 | 27 hours

DevOps Journey with AWS | DIO | 2022 | 69 hours

Spread Full Stack Developer | DIO | 2022 | 98 hours

Languages and development tools

English: intermediate (B2).

AI-assisted development with Claude Code, Codex, Hermes and OpenClaw.
